

## WHAT DO YOU WANT OUR TRANSPORTATION SYSTEM TO LOOK LIKE IN 5 YEARS? 10 YEARS? 25 YEARS?

*Help us shape the direction of the plan by providing input!*

### WHAT IS A COMMUNITY TRANSPORTATION PLAN?

A Community Transportation Plan is a multimodal plan that identifies transportation needs for motorists, bicyclists, pedestrians, transit, and freight. Beyond that, the CTP seeks to establish a desired vision and identifies the incremental steps to achieve it. The Fuquay-Varina Community Transportation Plan will serve as a living document – one that the community can revisit as goals and projects are implemented.

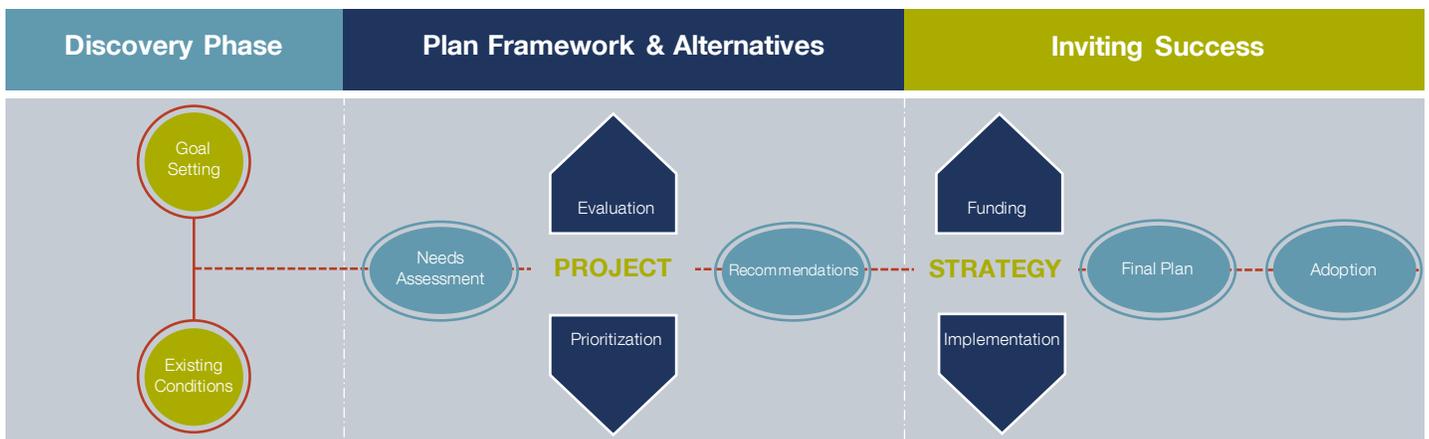

### WHO IS INVOLVED?

A successful Community Transportation Plan relies on the contributions of many groups and individuals. Every voice from members of the public to the project management team is vital in the planning process.

### WHAT IS THE PROCESS?

The intent of the planning process is to create an effective plan that positions the town to achieve measurable success. The process is organized into four overlapping elements that will be complete by June of 2017.

- **Vision & Goals** – Based on community input, a vision and set of goals will be created to provide direction on the development of the plan.
- **Existing Conditions** – the process begins with a comprehensive assessment of the community, including demographic trends, natural and built environment, and transportation conditions.
- **Needs Assessment/Draft Recommendations** – Based on community input and the Existing Conditions phase, existing and future multimodal needs will be identified. Projects that address these needs will be prioritized using the Vision & Goals.
- **Final Recommendations** – An action plan will be created that identifies strategies to support the implementation of the community's transportation vision.

The Fuquay-Varina Community Transportation Plan cannot be completed without your help! Your input and feedback will ensure the plan stays on track with what the community wants as the Town's transportation future.

**Join us at the first public workshop:**  
December 6th | 5:30 to 7:30 PM  
Public Service Center  
1415 Holland Road
